Mayor Lent,

Thank you for contacting me. It was surprising how it came about, but when Natacha Sesko saw the signs that Kitsap Health put on the beach, she called my cell phone to ask me about what was happening. We have talked a couple of times and she is being very cooperative in granting all of us access to her property. I have emailed an access agreement to her and to her attorney and am confident she will sign it and mail it back to us. In the meantime, she has given us verbal agreement, so the work is moving forward.

As you will have read in the pollution Report, Cascade Natural Gas Corporation has volunteered to dig up the pipe and take out the oiled sediments. They have already started site work and will be moving equipment on site today through Saturday. Monday 11/1 they will start the cleanup work. There will be a day of daylight work and then three to six nights of work when the tide is way out. The middle of the night is the only time they can get at the pipe and beach sediments that are exposed at low tide.

Cascade has hired Anchorqea and Aspect Consulting to develop and implement their work plan. Both companies are highly regarded in the environmental cleanup field and I am confident they will do an excellent job. They are addressing all the applicable and relevant regulations and applying best management practices to their work.

However, they are working in a mixed use neighborhood, so the trucks moving equipment and waste and the lights and noise from the night operation may cause some concern / annoyance to residents in the area. I welcome any input you have on how to best manage that issue and any other issues that concern you about this cleanup.

I am out on a job in Port Angeles this week but expect us to be done by Saturday. Please feel free to email or call me on my cell phone: 206 321 3796.

Thanks for your help!
Kathy Parker, USEPA R10

Hello Kathy,

I wasn't certain if you still needed my support and assistance in getting Natasha Sesko to sign the easement to create a beach road access over and above the problem pipe. She has agreed to sign anything you need and we can do this together in my office if that is agreeable. I see where you have verbal authorization and am still ready to be of service.

It appears you are well on your way and I applaud your ambitious schedule.

Patty Lent, Mayor
